

Electricity Distribution Management 2009–2011

Description of the Change Project

This form can be downloaded in word format from www.edm2009.com

Name of the Applicant: _____

Signature of the Applicant: _____

The organisation/institution/company of the Applicant approves the change project described below and considers it realistic that the project shall be possible to complete its implementation not later than May 2011:

Date: _____

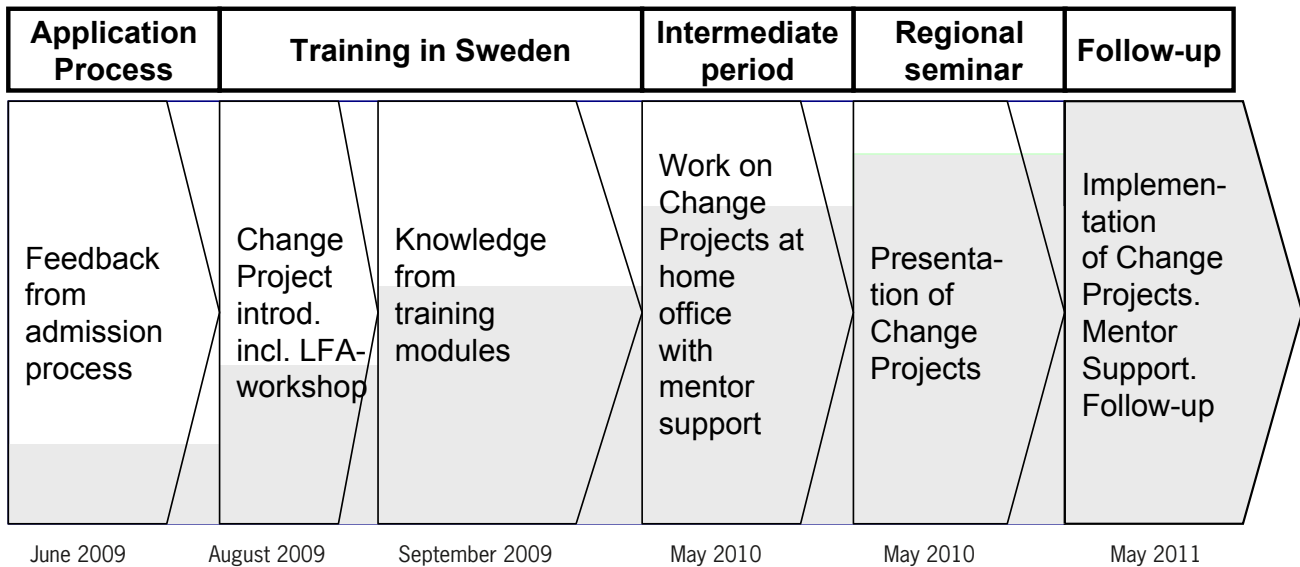

Signature of organisation/institution/company: _____

Name and position: _____

Short description of the **applicant's organisation** (incl. organisation chart):

Main **problems in** relation to the **electricity distribution** in the country:

Description of the Change Project

A condition for the selection as participant in the EDM programme is a well described Change Project. The project shall accomplish a sustainable improvement and include new elements methods for the country or organisation of the Applicant. The project shall have the objective to accomplish a change

Examples of possible Change Projects:

- Implementation of pilot rural electrification project.
- Implementation of loss reduction in pilot area/s.
- Improvement of customer service and customer satisfaction.
- Development and implementation of policies for local renewable energy solutions.
- Improvement of environmental conditions in pilot area/s by electrification.
- Establishment of local energy advisors.
- Implementation of energy efficiency programme in pilot areas.
- Implementation of procedures for improved cooperation between institutions, organisations, utilities, etc.
- Creation of model for prioritisation of electrification projects.
- Creation of models for management of isolated electrified areas.
- Development of financing models for rural electrification.

When **evaluation** the proposed change projects the following issues will be considered:

General relevance and realism

- Is the project within a relevant area for this programme?
- Has the project a technical relevance?
- Has the project a realistic size, not too small and not too big?

Conditions for implementation

- Has the applicant a position in his/her organisation to make it realistic to implement the project?
- Has the applicant a key position in the project?
- Is the applicant actively involved in formulation and implementation of the project?
- Has the applicant sufficient support from his organisation?

Economy

- Has the project a realistic economy?
- Can the project be financed?

Sustainability

- Can the project become sustainable?
- Is the project robust in choice of technical solutions and organisation?

Performance improvement

- Will the project contribute to extended, more reliable and more stable electricity supply?

Relation to relevant processes in the country

Poverty reduction and improved gender equality

- Will the most poor in the country benefit from the project?
- Will the project contribute to increased equality between groups in the society and between women and men?

Environmental aspects:

- Has environmental aspects been considered?

The total text given below must **not exceed two pages**. The text fields given below can be expanded as required, as long as the total number of pages is not exceeded. Please use **Block Letters**

Description of the project:

Time schedule for the project:

Applicant's role in the project:

Expected **impact/result** of the project (on electricity supply, on poverty reduction, etc.):

How can **sustainability** of the project be assured:

Environmental considerations in the implementation of the project:

Required **support** from your organisation to implement the project:

Expected **costs and financing** of the project:

Describe if there are any **other related change projects** under implementation in your organisation or in your country:
